EXPERIENCE

COVALENT CAPITAL | SOFTWARE ENGINEER

MAY 2018 – PRESENT

Revamped the FrontEnd Code by extracting out the common components, adding new features and improving file structure of Order Management and Allocation System(OMAS). Developed a prototype of mobile version in parallel.

FACEBOOK OPEN SOURCE MENTORSHIP PROGRAM | STUDENT DEVELOPER

FEBRUARY 2018 – APRIL 2018

Developed new features and resolved bugs from Facebook Instant Articles SDK and Facebook Instant Articles Editor.

GOOGLE SUMMER OF CODE | STUDENT DEVELOPER

MAY 2017 – AUGUST 2017

Developed the responsive user interface, removed inline javascript, resolved bugs, added new features like progress bar, etc suggested by community in phpmyadmin web interface.

BLUECUBE NETWORK | SOFTWARE ENGINEERING INTERN

MAY 2016 – JUNE 2016

Developed the admin dashboard with other 2 interns so that company can check three types of stats: user stats, website stats and system stats for https://www.perfmon.io/ website and then use the data for making profits and decreasing cost of their product.

RUN4OFFERS.COM | FOUNDER/CEO

JULY 2015 – DECEMBER 2015

Developed an online shopping portal with 2 colleague to provide free mobile recharge on all shopping orders made on partner sites Amazon, Flipkart etc. Under 2 months of launch, website has reached more than 15k views per month with the help of one promotion campaign done inside my college. Closed after 6 months of operation.

PROJECTS

IMAGE CLASSIFIER | WEB APPLICATION

Developed a web application using Flask (Python Full Stack Framework) that analyse the faces from given image using Amazon Rekognition API and then display the details of every face like age, gender, emotions etc.

SAVE THE LINK | WEB APPLICATION

Developed a web application for React Riot 2017 online hackathon using React and Google Firebase that helps you to save your favorite links on the server instead of bookmarking so that you can access them later anywhere and any device. Website supports login through all the major social networking websites using Firebase.

CONTEST NOTIFY | AMAZON ALEXA SKILL

Developed Amazon Alexa Skill that will update you about the current and future programming contest available on different websites like codeforces, codechef and hackerrank. Extended the code for Google Assistant.

NEIGHBORHOOD MAP | WEB APPLICATION

Developed a web application for Udacity FrontEnd Nanodegree using React framework, that displays a Google Map of an area and various points of interest. Users can search all included landmarks and, when selected, additional information about a landmark is presented from the FourSquare API.
